Sennelo Mulanga

JUNIOR SOFTWARE ENGINEER

Johannesburg, South Africa | +27 69 794 9195 | mgsennelo@gmail.com
github.com/AlgoSumarai | linkedin.com/in/mulangasennelo | Portfolio

PROFILE

Junior software engineer focused on backend development, with commercial experience in Laravel ERP systems and production support. Builds C#/.NET and React/TypeScript projects using REST APIs, relational data and background workers.

PROFESSIONAL EXPERIENCE

RMSoftware
Jun 2026 - Present

Co-Founder & Software Engineer

- Communicate with clients to define requirements and keep development aligned with their needs.
- Develop client software solutions end to end, from requirements and design to delivery.

TheRad
Sep 2025 - Apr 2026

Junior Software Engineer | Remote

- Developed and maintained Laravel/Filament modules for a manufacturing ERP, implementing business workflows and admin functionality backed by relational data models and queries.
- Independently delivered a JavaScript learning platform with 26 maths games, owning architecture, game logic and deployment.
- Diagnosed and resolved production defects on a client-facing Joomla/PHP website; contributed to testing and deployment in a remote engineering team.

TECHNICAL SKILLS

Backend and data: C#, ASP.NET Core, EF Core, LINQ, PHP, Laravel, Filament, REST APIs, SQL, PostgreSQL, SQL Server, MySQL.

Frontend: TypeScript, JavaScript, React, Next.js, HTML, CSS.

Tools and practices: Git, GitHub Actions, Docker, Postman, unit testing, debugging, object-oriented programming.

SELECTED PROJECTS

ChessLens
C#/.NET, PostgreSQL, React, TypeScript, Docker

github.com/AlgoSumarai/chess-lens | In development

- Built a chess analysis and practice platform with PGN imports, legal replay and a separate Stockfish worker for background analysis.
- Implemented live progress updates, recurring-weakness insights and personalised puzzle practice with attempt tracking and spaced review.

AlgoDojo
Next.js, TypeScript, React, Zustand, SVG

Live demo | github.com/AlgoSumarai/algo-dojo

- Built an interactive algorithms and data structures platform, separating pure step generators from SVG visualisations and shared playback controls.

EDUCATION

BSc Information Technology | University of Johannesburg — Jul 2025
